

VENTAIR®

Woven Endowed with High Ventilation
絲織賦予高透氣機能

COOLING 涼爽透氣

VENTAIR®

High Ventilation 透氣涼爽纖維

VENTAIR® Yarn is unique fiber applied on woven textile, which creates numberless pores in fabric to increase ventilation.

VENTAIR® Yarn 一種獨特的纖維技術，透過組織設計VENTAIR® 紗線可在染色過程中溶於苛性鹼(NaOH)，溶解過的織物具有孔洞，可增加通風性來達到降溫涼爽。

Woven Endowed with High Ventilation

- VENTAIR® Yarns Soluble in Caustic by Modified Polymer
特殊高分子改質技術
- Get Pores by Dissolving VENTAIR® Yarn During Dyeing Process
染整中 VENTAIR® 被溶除，織物產生孔洞

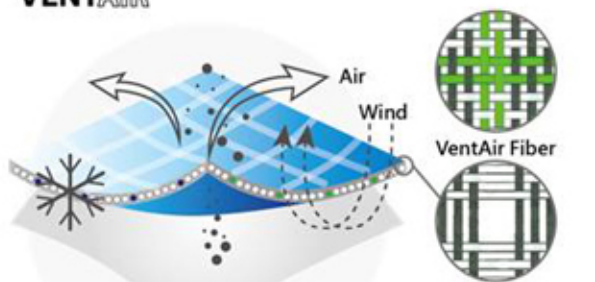

Specification

- 30/12, 50/24, 80/36 FDY

Application

VENTAIR

- 1 Technology in the Yarn
- 2 Dissolved By Caustic (NaOH)
- 3 Caustic Weight Reduction
- 4 Ventilation Cool

Core Value

- Ventilation Cool
- Knitting-like
