

Hi Cool[®] Performance fabrics

Dry 、 Comfortable and stretch

Hi Cool[®] is a revolution in performance fabrics and moisture management technology. With a superior moisture management system, it is able to expel moisture faster and further than any other fabrics in the market today, keeping you dry and comfortable. In addition to the excellent moisture management, the unique fiber construction of **Hi Cool[®]** provides special stretch for customers.

Moisture Management

Hi Cool[®] is a high-tech fabric specifically engineered to keep users dry and comfortable. **Hi Cool[®]** fabrics are made from specially engineered fiber construction. The structure helps take moisture away from human skin through the outer layer of the fabric faster than any other fabric and brings a comfortable feeling to the wearer.

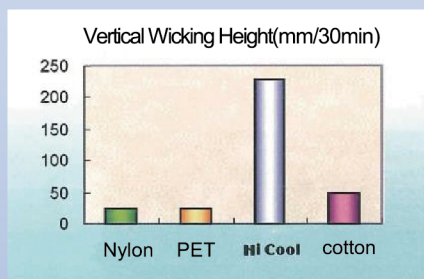

Durability 、 Easy-Care

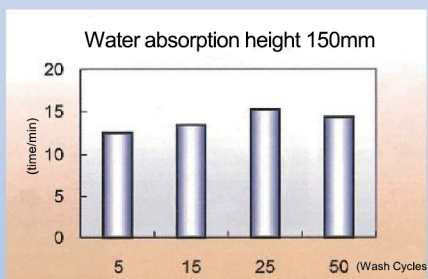

Garments made of **Hi Cool[®]** offer an excellent practical advantage that can be repeatedly machine washed and dried, but leave the construction undamaged, and hence keep the original appearances.
