### CHARACTERISTICS

PUFY®, a new fiber with moisture absorbing ability that allows excellent dryness. During sports, the micro grooves on the fiber surface can instantly absorb moisture on the skin by means of core absorption, expansion and transmission. The fibers on the fabric surface then evaporate moisture to keep the skin dry, comfort and cool. In this way PUFY® can easily dissipate the heat and maintain body temperature for activities in cold atmosphere to avoid body lose temperature. The cotton feels hand touch can bring extraordinary comfort to skin.
